

How to get started with weebly!

Step 1: While at SHS, use Google Chrome. Enter your name, valid email address and an easy password for the weebly account. Write your email here:

_____ Write your password here: _____

Step 2: Enter a title for your website: Use your name and Senior Project
Example: George Orwell's Senior Project

For type of site: Choose- **Education** For category type: Choose- **Class Project**
then Choose- **Continue**.

Step 3: Choose your website domain. Use a subdomain of weebly.com and enter the following: This formula for websites:

First name... Last Initial.... Seniorcreation18

For example: **jimdseniorcreation18.weebly.com**

Click Submit....be patient it takes a little while to create.

Step 4:

You will want to click on edit when you get to the "my site" page.

Step 5:

Once you are on the page. You can change the design by clicking on the tab labeled design and choosing from one of the templates. Fiddle around.. you can change fonts, photos, images all in the design feature.

About every 10 minutes, you want to **hit publish**...this means it is saving!

Step 6

Adding different tabs or pages: click on pages at the top and then click on Add page. Add a title to your page.

Remember to use the following:

- | | | |
|--------------------|----------------------------------|------------------------|
| 1. Home | 3. Career Aspirations | 5. Portfolio |
| 2. Acrostic | 4. Annotated Bibliography | 6. Presentation |
| | | 7. Extra Credit |

Remember if you make any changes in advanced settings...you must save(publish) your work.

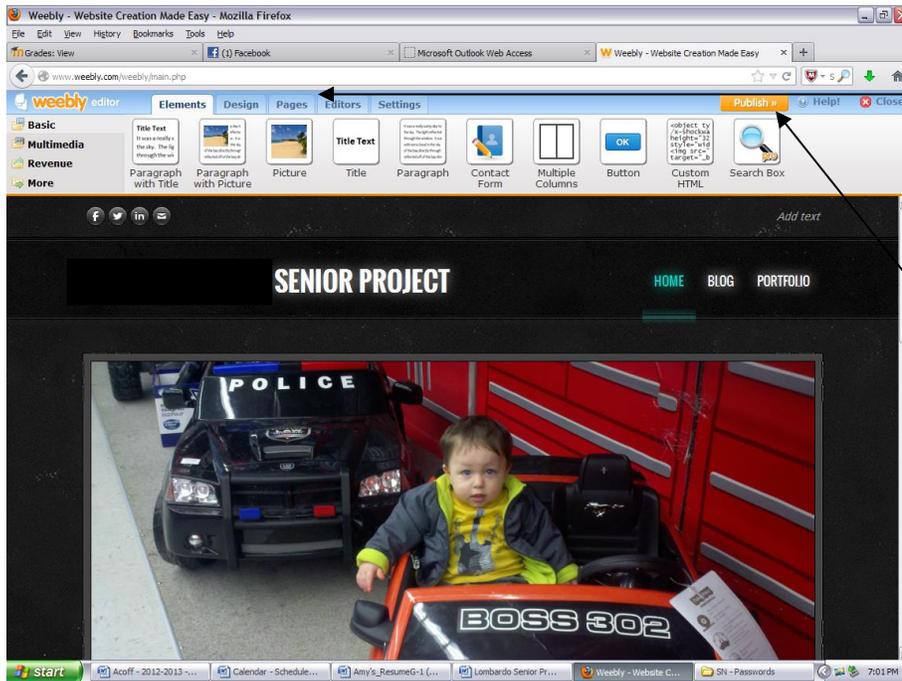

Step 7

Now that you've added all of your pages, it's time to work on each page. You want to add content. You will choose from the list of basic choices on the elements section there are also options in the multimedia section too! These will help when you are posting for your portfolio and resume sections. Usually you will choose the paragraph or one of the other basic options. Get creative and explore.

Don't forget to publish! Publish! Publish!

Using Weebly to Make Things and Saving!

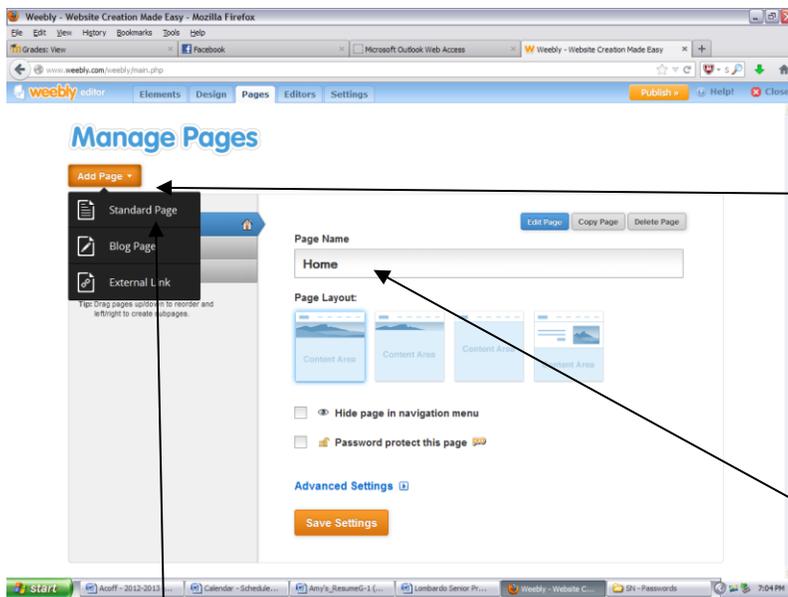

To add a page to your website, click the pages tab at the top

****TO SAVE****

Click the publish button to save your work and make your website active

You will then be taken to the following screen:

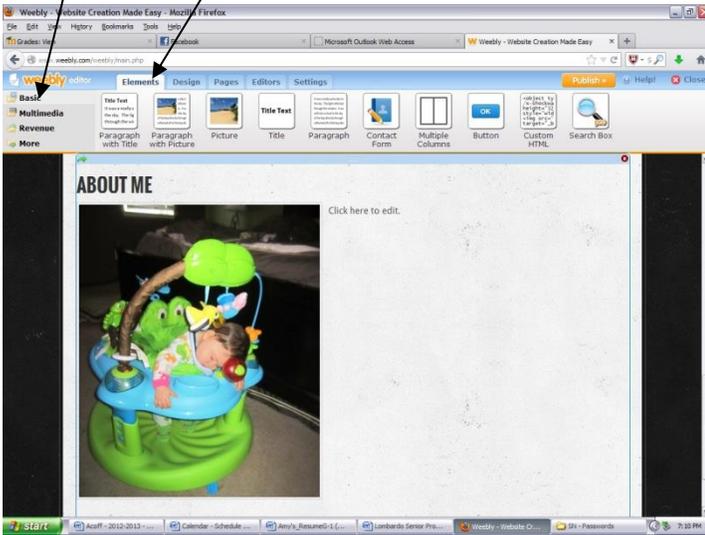

Click add page to see the three different options of pages

Change the name of each page here. Title them: Home, BLOG, Community Outreach, Resume and Portfolio

You will be selecting "STANDARD PAGE" for all of your pages EXCEPT the blog page

Adding Content to a Page

Under the elements tab, the "basic" options allow you to add things like paragraphs or paragraphs with pictures to your workable area

Change from basic options to "multimedia" to embed youtube clips, sound and other multimedia
